-
- - BananaEndocarp is a scripted GUI for interacting with MunkiWebAdmin2's API, for creating per-machine manifests.. Satellite tool kit for mac It's also to help those more experienced with Python to discover projects that they may be able to adapt, extend and/or contribute to..
 - - A server that works in coordination with a that provides a method of enrolling a Mac with Munki for certificate-based communication and a custom manifest.

- - Copies your own custom Generic png to any Munki items missing a corresponding icon.

[Zolid Scanner Driver For Mac](#)

Why is this list limited to Python? Why not include all projects in this space? Python is an especially popular language among Mac sysadmins; this restriction is partly so that those learning Python for Mac-specific tasks have a mostly-complete list of known code and approaches from which to learn.
